

Malo Hutson, PhD is an Associate Professor in Urban Planning and founder and director of the Urban Community and Health Equity Lab within the Graduate School of Architecture, Planning, and Preservation at Columbia University. He is also an Associate Member of the Earth Institute faculty at Columbia. Hutson is a widely-recognized scholar, teacher, and practitioner whose research at the intersection of urban planning and health inequities is of profound relevance in the planning of

today's cities across the United States, and around the world. Professor Hutson's specific focus is on community development and urban equity, racial and ethnic inequalities and urban policy, as well as the built environment and health.

Dr. Hutson has worked nationally and internationally on community-centered projects that improve the economic, environmental, political, and social well-being of urban residents. His research and writing have been recognized by numerous awards and grants, and his most recent book, *The Urban Struggle for Economic, Environmental, and Social Justice: Deepening Their Roots*, explores the efforts by coalitions of residents, community leaders, unions, and others to resist displacement as a result of neighborhood change and gentrification.

Dr. Hutson received his Ph.D. in Urban and Regional Planning from the School of Architecture and Planning at the Massachusetts Institute of Technology, and earned both his Bachelor of Arts in Sociology and Master of City Planning degrees from the University of California at Berkeley. Prior to joining Columbia GSAPP, Malo Hutson was an Associate Professor and the Chancellor's Professor of City and Regional Planning at the University of California, Berkeley, where he also served as the Associate Director of the Institute of Urban and Regional Planning (IURD) and Chair of the Urban Studies Program. In addition, Dr. Hutson is an alumnus of the Robert Wood Johnson Health and Society Scholars Program where he was a fellow at the University of Michigan's Center for Social Epidemiology and Population Health within the School of Public Health.
